

HMDA/CRA Export for QuestSoft® & Laser Pro®

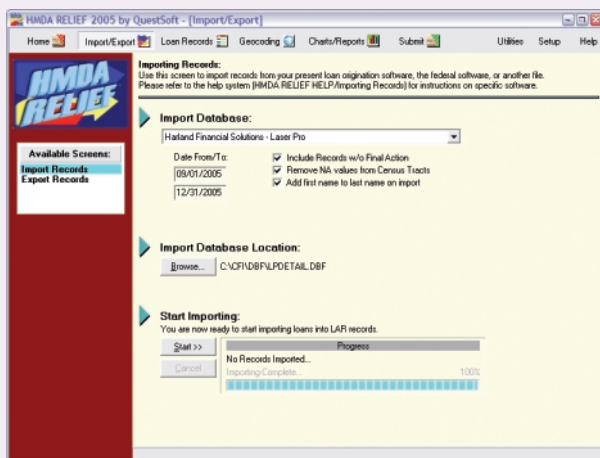

Harland Financial Solutions and QuestSoft® have partnered to provide a robust solution for Home Mortgage Disclosure Act (HMDA) and Community Reinvestment Act (CRA) reporting through an interface to Laser Pro®. Questsoft is a leading provider of easy to use, affordable HMDA and CRA software and services.

Use the QuestSoft-Laser Pro interface to save time, reduce errors and streamline your workflow when preparing HMDA and CRA reports.

Features

The interface is directly integrated into QuestSoft's popular HMDA RELIEF and CRA RELIEF software. A license code from QuestSoft activates the interface, which imports over 80 fields from Laser Pro. Imported fields include all HMDA and CRA reportable data, as well as Fair Lending data to ease compliance. The interface provides:

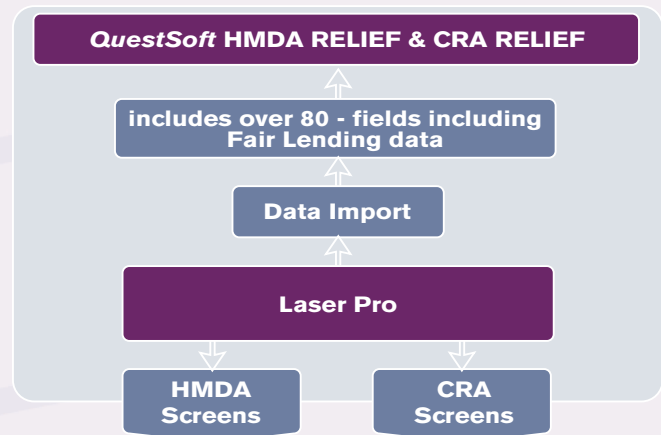

- Direct connectivity to Laser Pro that scans and imports over 6000 records per minute on average
- Customer names (first and last) and addresses. This data can be geocoded with QuestSoft's Instant Geocoder® to include pertinent information about income levels within census tracts, as well as other demographic data
- The latest HMDA specifications, including new ethnicity/race codes, pre-approval statuses and rate-spread calculations
- The ability to run over 30 detailed analysis reports with the click of a button in HMDA RELIEF and CRA RELIEF after data import from Laser Pro
